

Marine Advisory Committee

February 4, 2014

Milton, Florida

The Marine Advisory Committee met on the above date with the following members present: Jeff Marker, Scott Mason, and Scott Walker. Also present were the County Administrator, Hunter Walker; Chris V erlinde, Marine Extension Agent; Roger Blaylock, County Engineer; Sheila Harris, Grants Coordinator; and Avis Whitfield, Public Works Director. Chairman Jeff Marker called the meeting to order at 5:00p.m.

The minutes of the December 3, 2013 meeting were approved.

BP OIL SPILL RELATED GRANTS AND PROJECTS

Sheila Harris, Grants Coordinator for Santa Rosa County gave an update on the NRDA Phase III Public Hearing which took place last night. She said the purpose of the meeting was to inform the public on the NRDA process. Each project was briefly described and is in the Summary sheet (see attached). She stated that there was discussion on the Pensacola Fish Hatchery which seemed to have mixed support and also some comments from the Audubon Society regarding the Navarre Beach projects and the concerns with bird habitat.

Ms. V erlinde stated that she had met with an individual from Florida Fish

& Wildlife to

1

There was discussion about allowing Fish counties being involved with it. Mr. Walker said if the county did the contracting they would have the flexibility to make changes as they deem necessary and would probably be done much like in the past through an artificial reef grant. This committee would then recommend a design.

Mr. Walker stated that the Audubon Society had concerns about two boardwalk crossovers, one gulf side and one sound side. The concern seems to be more about the gulf side crossover that was actually just lifted from the DEP state plan when they had developed the original state park in the early 2000's where they ended up with more project than money. Mr. Walker said that they excluded the we call the 3rd dune crossover pavilion that is on the gulf side. He said that we took their design, updated it and then submitted it as a NRDA project. It is included in the list but the concerns seem to be parking and whether or not it conflicts at some level with the nesting birds.

FY2014 FLORIDA BOATING IMPROVEMENT PROGRAM (FBIP) CYCLE

Mr. Marker asked what we might have available through our typical programs this year without the NRDA funds. Mr. Walker referred to the FBIP grant information that Sheila Harris had compiled which shows the application period and eligible uses. He added that this can't be used for artificial reefs. Ms. Harris said that the application typically takes 30 or more days to develop and the Board of County Commissioners will need to provide input on a proposed project. She suggested that if anyone has a proposed project that meets the attached guidelines to email Avis Whitfield or Roger Blaylock. If the project does meet the criteria it would be taken to the Board before developing an application.

& Wildlife to do all the contracting or the4th crossover which is what

Mr.

ramps. Mr. Whitfield said mainly the maintenance of what we already have rather than new construction. He added that they do. allow piers and docks which we already have at our ramps.

Ms. Harris said another consideration would be to request funds for construction but the permits would either need to be in hand or been submitted by the time of the application submittal She added that you could expect the permit approval within 60 days but if they award the grant and you don't have the permits in hand, the grant funds will be taken away. She said that a preliminary design grant could be applied for but typically that is done in house.

Mr. Marker asked if there were any artificial reef projects coming up. Ms. Verlinde said there is presently an RFP open. She added that she had spoken with Mr. Turpin about resubmitting the project because the sites have now been permitted but he indicated that he didn't think it would score well because the whole panhandle is receiving money in

Marker asked Mr. Whitfield if he knew of anything we might need for our boat artificial reef development.

big vessels and Ms. Verlinde said it would not be through the NRDA process.

Mr. Mason asked about allocations becoming available for

CHAIRMAN/MEMBER ISSUES

Scott Walker reported that he had taken a trip out to Webb, Keyser, Chumuckla, Williams and Carroll landings and distributed photos that he had taken. He stated that they were all very well maintained but did note that there is a sunken boat at Williams Landing that looks as if it has been there for a while but is not in a hazardous area.

There was discussion about the log jam on Escambia River and whether Escambia County would pursue a grant.

approved participating with Escambia County. Scott Walker said he had spoken with Com. Salter who is aware of the jam.

much there were going to clear out and how much they were going to leave.

said he would get an update from Com. Salter.

touch with

matching funds with them.

Mr. Walker said that at one time Santa Rosa County hadMr. Mason said there was another issue of howMr. WalkerMr. Mason said we should also get inMr. Turpin and inquire about the marine sources since we were going to do

PROJECTS

ISSUES UPDATE

Boater Registration Fees as of January 31, 2014 is \$140,917.

NEXT MEETING DATE

The next meeting is scheduled for March 4, 2014 at 5:00p.m.

ADJOURNMENT

There being no further business to come before the Committee the meeting was adjourned at 5:30 p.m.

discuss artificial reefs. She said that out of the 11.8 million dollars being allocated for artificial reefs, this will not only be for deployment but for admin costs. She added that

the permitting costs are not included in this amount. She said that at this time it is not known what the share will be for each county and if we will get specifically what we had asked for. She said that hopefully we will know something in the next three weeks. Mr. Marker asked if we would be able to provide input as to the location provided that some of the money and material will be coming our way. Ms. Verlinde reminded the committee that this is not an open process when there is litigation involved. She said that the trustees and attorneys will be the ones to make the decision. She added that at last night's meeting one of the things that was expressed was if individuals would like to make comments, the public comment period is open until February 19th and can be done through mail or online. Mr. Walker encouraged everyone that wished to make comments to make sure to note that they are a member of the Santa Rosa County Marine Advisory Committee.

Mr. Walker said that Robert Turpin had attended the meeting last night as well as their MAC Chairman who spoke generally in favor of reefing and reef projects. He added that comments had been made that there were too many reef projects that they view as recreational projects as opposed to habitat enhancement.
